

Fit misting kit in front of fan guard using cable ties supplied.

MISTING

KITS

Combined with an air circulating fan, a misting kit provides rapid cooling to work areas and outdoor recreation facilities. Misting kits produce an ultra fine mist that provides cooling through evaporation. This helps reduce fatigue in the work place and improves productivity on a hot day. They are designed to easily fit to the front grille of most cooling fans and work on standard house mains water pressure.

- Available in 3, 5 and 7 nozzle kits.
- High quality brass nozzle with long wearing stainless steel orifice and pin.
- 19mm hose adaptor fitted with a low maintenance stainless steel filter.
- Maximum working pressure 125psi.
- Works on domestic mains water pressure.
- O-ring fitted on all nozzles to minimise leaks.
- Comes with click-on hose connector.

Model No.	Nozzles	Suitable Fan Size	Approx. Water Usage
FMK3	3	630mm	4 L/h
FMK5	5	630mm	7 L/h
FMK7	7	750mm	10 L/h

Low maintenance stainless steel filter inside hose adaptor.

Nozzle MC103

High quality brass nozzles can be easily removed for cleaning.
