Tegrabond Manual Water-Activated Tape Dispenser

Product Information

This dispenser is perfect for use in light to medium-volume packaging areas and can be used with either reinforced or non-reinforced water-activated tape. A steel side frame construction ensures durability and long life. Two water brushes provide a consistent, uniform wetting of adhesive alongside superior mechanics and a guillotine blade that delivers clean, even cutting of both reinforced and non-reinforced tape. A large water reservoir means fewer refills and less downtime. The portable dispenser requires no electricity and can be moved easily from one packaging line to another. Quickly choose one of 15 preset tape lengths on the clearly marked dial.

Product Data

- Dimensions: 495 x 241 x 318mm
