Product Description

HypaStop Wound Closure Strips provide casualties with a quick, simple and less scarring alternative to staples and sutures. These adhesive strips hold the edges of a wound in place while the skin works to heal itself. Typically, these strips are used to help close minor cuts and wounds but can also be used on minor surgical incisions.

They are ideal for wound treatment when there isn't an excessive amount of bleeding, and the wound isn't on a joint or area of the body that moves frequently. Wound closure strips are also known as skin closure strips, suture strips, butterfly stitches or butterfly bandages.

The strips are sterile, hypoallergenic and latex free.

Why use wound closure strips?

HypaStop Wound Closure Strips provide superior cosmetic results when compared to traditional stitches and can help to reduce scarring.

How long do they stay on?

HypaStop Wound Closure Strips usually remain in place for 5 to 7 days, and in some cases, up to 14 days. They are designed to naturally detach as the wound heals. If they have not fallen off by then, they can be removed by gently soaking them with warm water.

What's in a pack?

Each pack contains 122 strips (17 applications) in sterile wrapped pouches of the following assorted sizes:

64x - 4mm x 38mm

40x - 4mm x 76mm

18x - 6.4mm x 76mm

General Specifications

Product Dimensions	16.5 x 10 x 3 cm
