RS Pro Insulated ground strap

Product Details

RFI/EMI Shielding Products, Insulated Ground Strap

Flexible, double-insulated ground straps manufactured from laminates of copper and Mylar

Punched and tinned ends to facilitate termination

Provide a low impedance ground path at RF frequencies, reducing the problems caused by radiated EMI when using conventional wire grounds

May be used to:

Link two chassis together

Link cabinet panels to chassis ground

Link CRT driver boards to chassis ground

Accessories

Specifications:

Length	228.6mm
Height	12.7mm
Material	Copper
For Use With	RFI & EMI Shielding
