

Custom Fan Manufacturing & Design Services

The unique Higher Level Assembly (HLA) solution from ebmpapst

ebmpapst

engineering a better life

HLA is a comprehensive fan manufacturing and design service that enables you to shorten your supply chain, speed up your production line and lower your total cost of manufacturing.

ebm-papst offers a specialist 'one-stop' outsourcing solution, that allows you to off-load certain production processes directly to the manufacturer – giving you a high-quality, 'plug-and-play' fan that is warranted and certified to your specification. This Higher Level Assembly service includes our comprehensive in-house design and manufacturing capabilities: sheet metal fabrication, cable assembly, connectorisation, box-build, assembly and testing. Our dedicated team of engineers are adept in mechanical design, electrical and electronic design and production engineering.

HLA production processes

+ Sheet metal fabrication	+ Harness build	+ Electrical/Mechanical design
+ Automatic tube and wire cutting	+ Painting and finishing	+ Automatic crimping
+ Metal machining	+ Lead free soldering	+ MiG & TiG Welding

Contract manufacturer covers procurement, production build and customer logistics.
