

3D PRINTING ACCESSORIES

Verbatim's comprehensive line of storage accessories includes an assortment of items that are the perfect complement to any 3D printer.

Memory Cards

For 3D printers that utilize SD slots, Verbatim offers a superior selection of memory cards. With storage capacities of up to 256GB, and ultra quick read/write speeds of 90MBs/80MBs, you can efficiently manage all your 3D data.

USB Drives

With available capacities up to 256GB, and USB 3.0 options for super fast transfer speeds, these small, compact drives are an ideal way to share and transfer 3D models with clients, co-workers or friends.

SSDs

Boasting incredible speeds up to 450MB/sec, Verbatim Solid State Drives allow you to swiftly handle large volumes of 3D files. Additionally, these compact, lightweight drives are shock resistant, making them ideal for transporting files.

HDDs

Featuring storage capacities up to 2TB, Verbatim portable and desktop hard drives reduce physical clutter and allow you to house an extensive library of 3D files.

Optical

Verbatim is the #1 brand for optical media in the world, offering a broad range of Blu-ray, DVD and CD products, perfect for long-term archival of your 3D model library or individual projects.
