38IM Series

Impact ready sheet metal hole saw with 1/4" hex shank for quick size change

NEW

- **Optimized for Sheet Metal Cutting** – Shallow cutting depth prevents over-cutting, making it ideal for fast, clean holes in thin metal materials.
- **Impact-Ready HSS Pilot Drill** – Equipped with a durable HSS pilot drill and a 1/4" hex shank for quick changes and secure use with impact drivers.
- **Built for Impact Drivers** – Specifically designed for safe, efficient operation with impact drivers, increasing speed and productivity on the job.
- **Integrated Depth Stopper** – Stops the hole saw from cutting fully through the material, protecting underlying surfaces or equipment and improving control.
- **Easy Core Removal** – Built-in ejector spring automatically pushes out the cut core, reducing downtime and improving workflow efficiency.
