

VACCUM BRAKE BLEEDER

DF.DEP3

1. OPERATING PRESSURE 6-10 BARS

Provides fast, thorough, and reliable brake bleeding for a wide range of vehicles, saving time and effort while ensuring optimal brake performance.

2. PRESSURE GAUGE INDICATING THE VACUUM VALUE

Allow real-time monitoring and control of the vacuum level preventing over- or under-vacuum while providing consistent results and easy troubleshooting.

3. CAN BE USED ON LV, MOTORCYCLE

Offers versatile application, convenience, and cost savings, making brake maintenance easier for a wide range of users.

4. VENTURI PRINCIPAL OPERATION

Offers reliable, efficient, and safe brake bleeding using only compressed air, making it a practical and cost-effective choice for many workshops.
