

Slide Strip 8 ESD, black

item

Slide Strips serve as slide elements when transporting goods or work-piece carriers, for example. They can be fitted into the profile grooves, are hard-wearing and have a low coefficient of sliding friction. Slide Strips have a permissible loading of 2 N/mm².

Slide Strips are made of an electrostatically dissipative plastic (surface resistance < 10⁹ Ω), which makes them ideal for use in ESD-safe constructions.
