## CableIQ Qualification Tester

Click here: [Virtual Product Demo](#)

Copper qualification tester troubleshoots and qualifies cabling speed (10/100/1000/VoIP).

- **Qualifies** - Sees if your existing cabling has the bandwidth to support voice, 10/100, VoIP or Gigabit Ethernet
- **Troubleshoots** - shows why existing network cabling cannot support the network's bandwidth requirement (e.g. crosstalk at 11 meters)
- **Discovers** - detects what's at the end of any cable and displays device configuration (speed/duplex/pairing)
- **Identifies** unused switch ports that can be reallocated
- **Graphically maps** wiring configuration and shows distance to faults with Intelligent Wiremap
- **Tests** all copper cabling media: twisted-pair, coax, and audio cabling
