

## Features

- Huntington-pattern wheel
- Straight handle for efficient operation
- Apply to wheel dressing.
- Made of heat-treated, medium-carbon steel

## RS PRO Dressing Tool

RS Stock No.: 0227846

RS PRO is the own brand of RS. The RS PRO Seal of Approval is your assurance of professional quality, a guarantee that every part is rigorously tested, inspected, and audited against demanding standards. Making RS PRO the Smart Choice for our customers.

## Product Description

### RS PRO Dressing Tool

Essential for anyone working with an abrasive wheel, this RS PRO dressing tool is applied to the wheel to condition it. Its Huntington-pattern spinning cutters will sharpen your grinding wheel's surface.

This Huntington dressing tool is designed to remove bonding material from a grinding wheel and sharpen it by fracturing its grit. As it has star-shaped wheel cutters and spacers, it won't destroy the original surface texture. Made from heat-treated medium-carbon steel, the dressing tool is strong and durable.

The dressing process should be carried out regularly to improve a grinding wheel's efficiency and to extend its lifespan. This tool is regularly used to dress abrasive wheels in workshops and foundries, as well as many industrial manufacturing environments. Extensively tested by RS PRO, this device meets our exacting standards for safety and quality.

## Mechanical Specifications

Wheel Type	Dressing Tool
Total Length	20 cm
Width of steel plate in total	0.95 cm
Qty of steel plate	4
