	continuous use. To save time and effort when fitting the tubings, try the HellermannTyton NA three prong tools and the Hellerine lubricant, which are specially designed for use with HellermannTyton chloroprene tubing.
Application Method	Thread required sleeves onto the closed prongs. Expand the prongs and slide the wire into the sleeve opening. Close the prongs and hold the sleeve onto the wire and slide the tool away from it. It is advisable to use a lubricant to help removal of tool from the wire due to the elastic tension inherent in these elastomeric sleeves.
