FUJIFILM—Simply More Advanced

# Slimmer, Smaller, Lighter: The New

## Smaller, lighter, and more convenient

The QuickSnap Super Slim and QuickSnap Super Slim Flash are the smallest and lightest film-with-lens units in the world. Compact and stylish, they fit anywhere and go everywhere.

## Outstanding picture quality

A high-performance aspherical lens provides superior sharpness, while the pre-loaded 25-exposure cartridge of new Hi-speed 400 Advanced Photo System film assures beautifully rich color reproduction.

## FUJICOLOR *QuickSnap* SUPER Slim

Super-compact size and picture-perfect performance make the QuickSnap Super Slim the ideal companion for outdoor events and activities of all kinds. Take it along – and take home the photographic memories.

# Look in Photographic Convenience.

## A flash of brilliance

With just a touch of the flash button, the QuickSnap Super Slim Flash begins charging, instantly and continuously, so you'll always be ready for the next shot.

## User-friendly, environmentally-friendly

Friendly features like the clear, centrally located viewfinder make the new QuickSnap Super Slim models a snap to use. And for the sake of our environment, they're designed for efficient recycling.

**FUJICOLOR**

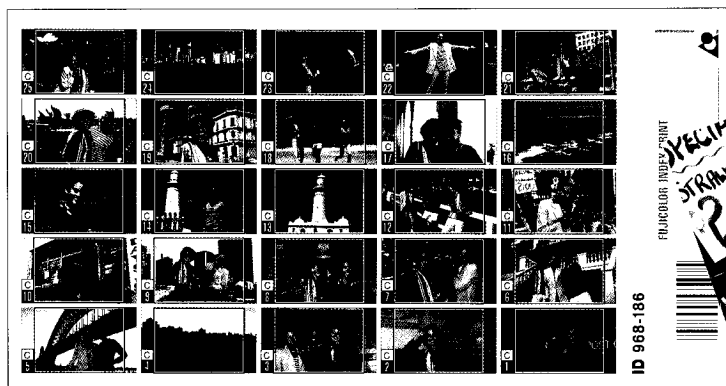

**QuickSnap SUPER Slim Flash**

Thanks to its quick-charging flash, you'll never miss a photo opportunity with the QuickSnap Super Slim Flash, even in low light indoors or at night. It's perfect for capturing the fun at parties and other gatherings.

# The Advanced Photo System: A Simply More Advanced Way to Enjoy Photographs.

The Advanced Photo System is a revolutionary new system designed to make photography easier, more enjoyable, and more exciting than ever before.

Index Print

Cartridge

## Simplified negative storage and easier reorders

Instead of hard-to-handle strips of negatives, your processed film is returned safely to you inside the specially designed film cartridge. When you pick up your photos from the lab, you receive your prints, an Advanced Photo System cartridge containing the processed film, and a convenient index print showing at a glance all the photos inside. The result: easier sorting and storage of your negatives, and simple, foolproof ordering of reprints and enlargements.

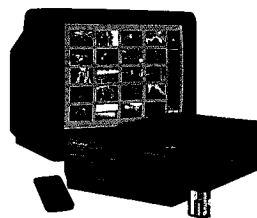

## The photofinisher certification symbol

For complete Advanced Photo System photofinishing services, look for this mark. It's the sign of Fujifilm-approved quality and reliability.

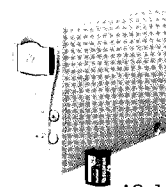

## Your link to digital technology

Perhaps the most exciting part of the Advanced Photo System is the many new ways in which it lets you enjoy your photographs. The new cartridges can be read by a growing range of photo players, scanners, and other peripherals. Display photos on your TV screen, input them into your personal computer, or use them with other electronic media – the possibilities are unlimited.
