

Longlasting polyester enclosures

Built-in canopy which protects the door and its gasket.

External attachment to wall by means of adjustable or stainless steel or polyester fixing lugs.

Reversible internal door grid patterned, for industrial control.

Direct attachment to wall through rear of enclosure, with cap to maintain double insulation and sealing. Four inserts at the back for fixing of mounting plate.

for your installations **POLYMEL**

The 25 mm pitched moulded locations in the back of the enclosure, allows the direct attachment of mounting rails or other devices, reducing or assembly time.

Locks are located outside the gasketed area to maintain the IP66 degree.

Cabinet with transparent templated glass door maintaining the IP66 and IK8 (5J) degrees of protection.

4 moulded bosses set inside the door for inserts help to assemble accessories. Maximum usable space, door provided with a grid pattern for centering of equipment. Door opening over 180°.

Self-ventilation windows at the rear of the cabinet.

Ventilation louvres provide natural ventilation to interior of enclosure, thus avoiding condensation.

Depth adjustable supports with positions every 12,5 mm. Front part drilled to M6 Ø in order to fit mounting plates.

The captive in polyurethane sealing gasket ensures the IP66. Internal stainless steel hinges, built in the door with safety pins, easily removable.

IP66 (EN 60529)

PLM-75

PLM-75/CME

Glass-fibre reinforced polyester cabinets.

- One-piece monoblock body.
- Colour grey RAL-7032.
- Completely reversible.
- Designed for use both indoors and outdoors.
- Wide range of accessories allowing for their use in distribution, control and measurement panels for industrial and recreational installations.
- Inserts located at the front of the cabinet for fixing of distribution chassis and internal door.
- Self-extinguishing.
- Maximum working temperature ranges from -50 to 150 °C.
- Resistant to principal chemical and atmospheric agents.

- Corrosion resistant.
- Stable to ultra-violet rays.
- Prepared for double insulated boards in accordance with IEC 439-1 (EN 60439-1) standard.
- High resistance to mechanical impacts IK10 (20 J) in accordance with EN 50102.
- IP66 according to EN 60529.
- UL approval according to UL 50, grades Nema 4X and 12.

Mounting plates

A complete range of plates which can be directly fixed to the enclosure supports or to the depth adjustable supports provides the solution to this type of installation.

- Metal plates made of galvanized steel.
- Bakelite insulating plates.
- Galvanized steel mounting plates with 3,6 ∅ drillings, 12,5 mm thread.
- Universal plates for quick fixing of equipment made of bichromated zinc-coated steel.

Dinimel DLA distribution chassis

PLM-64/KT + DLA-48P

Distribution chassis assembly for modular equipment, ref. **DLA-...** with adjustable distance between the 35 mm symmetrical profile and cover plate from 40 up to 85 mm.

- Chassis made of galvanized steel.
- Cover plate and frame made of self-extinguishing material to RAL-7035. Quick fixing without screws.
- Circuit identification system supplied as standard.
- Terminal blocks for earth and neutral wiring.
Ref.: **RBLZ/21656** supplied as standard.

* Internal plain door, A and B being dimensions of the usable surface.

Wall mounting set

Wall mounting can be made both directly (by drilling the enclosure back) or by the polyester fixing lugs **PF/PLM** or by the inox fixing lugs **PFI/PLM**. Fixing lugs are mounted from the back of the enclosure by using M8 inserts (included as standard). In **PLM-32** models are mounted by selftapping screws. Fixing lugs can be mounting both vertically and horizontally.

Rail fixing insert

Insert nut specially designed to fit to the back of the enclosure for quick fixing of 35 mm rails through self-tapping screws (supplied as standard) (ref. **TCO/PLM**) or for direct fixing to the enclosure back (ref. **TCO-M6/PLM**).
 ■ Made of insulating material.

Reference	Screw type
TCO/PLM	Self-tapping
TCO-M6/PLM	M6

35 mm symmetric rail

35 mm symmetrical rails for the support of switchgear, especially adapted to the width of the cabinets. Fixing to the back of the enclosure by means of set **TCO/PLM**.

To fit to enclosures	Reference	Width
PLM-32	CO-200/PLM	180
PLM-43	CO-300/PLM	280

PLM-75	CO-500/PLM	480
PLM-86	CO-600/PLM	580
PLM-108	CO-800/PLM	795

Air vents

To equalize external and internal temperatures and thus prevent condensation within the enclosure. Can be fixed on the internal sides connected with the rear self-ventilating window, ref. **VM-35**, or externally refs. **VM-25** and **VM-27**.

Reference	Characteristics
VM-25	For fitting externally to all polyester enclosures
VM-27	For fitting to POLYMEL inside enclosures
VM-35	For fitting to POLYMEL inside enclosures

Draining device

To remove water from condensation. Fixed to the 9 mm housing on the bottom of the enclosure. Protection degree IP55.

Reference	Characteristics
VEA-9	For fitting to all cabinets

Cable gland plate

Flat cable gland plates made of fully-gasketed polyester with fixing screws.

For fitting to enclosures	Reference
PLM-75/86/108	TLA-4420
PLM-108	TLA-6420

Pole fixing set

Allows the fixing of the enclosure to concrete, wooden or aluminium poles up to 675 mm in perimeter.

- For outside installations, building sites, public lighting panels...
- Stainless steel clamps and galvanized steel profiles.
- Fixing of profiles to the inserts on the back of the enclosure through M8 screws supplied as standard.
- Maximum weight recommended for the installation: 100 kg.

To fit to enclosures	Reference
PLM-43	SFP-300
PLM-54 and PLM-64	SFP-400
PLM-75	SFP-500
PLM-86	SFP-600

Supporting pole

For protection of incoming and outgoing cables whenever the enclosure must be kept off the ground: outside installations, camping sites, marinas... Made of fibre glass reinforced polyester.

- Steel frame for fixing to the ground.
- Easy fitting.
- High mechanical resistance.

To fit to enclosures	Reference

POLYMEL enclosures for outdoor industrial installations

Due to its plastic components quality and design, POLYMEL enclosures are suitable for panels in harsh environments where the contact with chemical and atmospheric agents is common: petrochemical, cement industries...

POLYMEL enclosures for indoor industrial installations

Their IP66 rating and high resistance to impact and temperature make them particularly suitable for industrial installations subject to processes with frequent water splashes such as paper mills, food plants, or car washing stations.

POLYMEL enclosures for leisure installations

Their resistance to corrosion and to ultra-violet rays make them ideal for installations by the coast and long exposure to sunlight.
