

FEATURES

- **Sintered Bronze Material:** Provides excellent wear resistance and self-lubricating properties, reducing maintenance needs.
- **5/8 in Length:** Ensures compatibility with a wide range of shaft lengths, enhancing versatility.
- **0.69 in Outside Diameter:** Facilitates easy integration into existing systems, saving time on installation.
- **0.49 in Shaft Diameter:** Offers a precise fit for optimal performance and reduced vibration.
- **Plain Bearing Design:** Simplifies construction and reduces the need for additional components, lowering costs.

RS PRO 5/8 in Sintered Bronze Plain Bearing

RS Stock No: 528-171

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

This RS PRO sintered bronze plain bearing is designed for applications requiring reliable and efficient rotational movement. Ideal for reducing friction between moving parts, it offers durability and low maintenance, making it suitable for various industrial settings.

General Specifications

Product Type	Plain Bearing
Shaft Diameter	0.49 in

Mechanical Specifications

Length	5/8 in
Material	Sintered Bronze
Outside Diameter	0.69 in
