

Passacavi

I passacavi sono ideali per la protezione meccanica di cavi e fili.

Caratteristiche del prodotto

- Istradamento cavi senza piegature e rotture
- Elevata resistenza alla trazione
- Flessibile e facile da applicare
- Elevata resistenza agli agenti atmosferici e chimici

MATERIALE	PVC ritardante la fiamma (PVC-FR)
Temp. di esercizio	da -30°C a +60°C
Durezza Shore A	56±5
Infiammabilità	UL94 V0

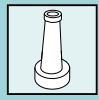

Protezione ed instradamento cavi senza piegature e rotture.

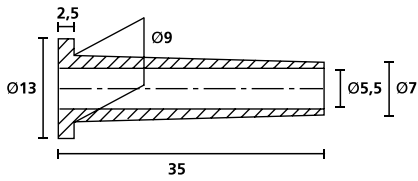

ARTICOLO	Disegno	Colore	UNS
