High-quality Wera bits for square socket screws. With an additional tempered BiTorsion zone, which reduces the hardness of the shaft by about 20% in comparison to the drive tip. This means that the peak loads that cause bit breakage and premature wear are absorbed in this zone - something which enhances the service life of the bits. Ductile and tough for hard materials e.g. sheet steel and metal. 1/4" hexagon, suitable for DIN ISO 1173-D 6.3 bit holders.
