

Instruction Leaflet

**Quick Hitch Arbor
(9.5mm)**

RS stock no. 615-258

The 'Quick Hitch' arbor enables the fast removal of hole saws (32mm and upwards) without the need for tools or removing the arbor from the drill chuck.

Simply screw the hole saw fully onto the arbor; reverse screw approximately $\frac{1}{2}$ a turn until the holes in the base of the hole saw are in line with the drive pins on the arbor, and push the rear collar of the arbor forward to secure onto the hole saw. To release, pull the collar back.

Replacement pilot drills are available; quote RS stock number 604-753.
