DESCRIPTION

24-litre oil hoover

Recoverers/vacuum cleaners for recovering used oil by gravity or by suction.

If they are used as hoovers, after depressurisation (creating a vacuum inside the tank and possibly the transparent bowl) they are self-contained and can be used anywhere.

Suction is provided by a probe selected from those supplied with the device.

All tank models are fitted with a level indicator.

The pressure required for pneumatic emptying is 2 bar.

The suction and discharge hose is 1.5 and 2 m long, with a drip-free plug.

Suction time with hot oil (70-80° C) and a ø 6 mm probe is 1.5-2 litres/min.

Ideal for rapid suction, using a probe, of used engine oil from cars, lorries, tractors, small aircraft, boats, etc.
