Kneeling Pad

Product Information

This Type-3 kneeling mat is convenient and is a very useful and versatile piece of personal protection equipment. Ideal for use in the workplace and in the house, providing an inexpensive yet effective solution for knee protection.

Anti-fatigue matting is ergonomically designed to help reduce stress caused from long periods of standing or kneeling by actively working the legs. This increases blood flow to an ideal rate and prevents numbness and aching in the feet. Cushioning abilities provide a soft, comfortable effect whilst helping to maintain a correct posture, allowing users to work for longer periods of time with less irritation, whilst providing insulation from cold surfaces.

Technical Information

Material: Ethylene vinyl acetate (EVA) foam

Colour: Black
