SKF Oil Injection Kits 729101 series

The 729101 series of SKF Oil Injection Kits are suitable for many applications using the SKF Oil Injection Method. Each kit contains an SKF Oil Injector complete with a high pressure pipe, pressure gauge, adapter block and a range of connection nipples.

- Injector can be used directly on the application or by connecting to the accessories provided.
- All items packed in a sturdy, compact carrying case especially suitable for field use.
- When the pressure is released, the unused oil is automatically returned to the reservoir, minimizing the risk of oil leakage to the environment.
- Oil container capacity 200 cm³ (12.2 in.³).

Typical applications

- Bearings
- Couplings
- Railway wheels
- Gear wheels
- Flywheels
- SKF OK Couplings
- For many oil injection applications where maximum pressures of up to 400 MPa (58 000 psi) is required.
