AZ6362

Alarm cable, 8–core, 250m

The alarm cable is a decisive tool for all wired systems. It is used to connect detectors, control units and information units to the alarm center. The alarm cable is very easy to dismantle. It is comprised of 8 shielded Litz wires, all galvanized and therefore perfectly protected against corrosion. Each cable has a different color. This allows you to conveniently connect detectors, control units and information modules to your alarm center without mixing up the individual cables. The alarm cable comes in lengths of 50m (AZ6360), 100m (AZ6361) and 250m (AZ6362, AZ6372)

Product highlights:

- 8x0.22mm²
- Length: 250m
- High–quality manufacturing
- Easy to dismantle
- Corrosion–resistant, galvanized, flexible wires
- Shielded cables

AZ6362

Alarm cable, 8–core, 250m

Technical Data			
Number litz wires	8	Resistor insulation	150 MOhm/km
Litz–wire diameter	0.22 mm²	Impedance	105 Ohm/km
Insulation	PVC	Length	250m
