

PBPS

PBPS...E

Production - DOL

Used to increase the production output on machines which would normally take a long period of time to come to rest after the stop button has been pressed.

Available in three formats with DOL starter, with Star Delta starter and without starter (for use with existing DOL or Star Delta starter.)

Production brakes offer compliance with the **PUWER 98** regulations, relating to the stopping time of motors within the woodworking industry.

- Reduced stopping time
- Increase production cycle
- Smooth controlled stopping
- Adjustable braking torque and stop time
- Easy installation
- Maintenance free
- Emergency stop button available on request. To order add (E) to end of part number £10.00 extra (e.g. PBPS3-400 becomes PBPS3-400E)

Single Phase DOL
