

The Licefa logo is positioned in the top right corner of the page. It consists of the word "Licefa" in a white, bold, sans-serif font, enclosed within a dark blue rectangular border that has a slight 3D effect.

Licefa

The background of the entire page is a collection of various plastic packaging products. On the left, there is a stack of black hard-shell cases. In the center, several smaller containers in yellow, white, and blue are visible. On the right, a large blue container and a white container are prominent. In the foreground, a blue container with a red latch is shown. All items are set against a light blue background and are reflected on a dark surface below them.

## Dear Customers,

We are delighted to present our brand-new packaging catalogue for 2025!

**The best news first:** there are **no price increases** planned for the coming year. You can find the current prices in the attached price list, valid from January 1 to December 31, 2025. However, we reserve the right to make price changes. For **up-to-date daily prices**, simply visit us online at [www.licefa.de/en](http://www.licefa.de/en).

We would particularly like to draw your attention to Chapter 3, "Membrane Boxes." Our range in this category has been further expanded, and these innovative packaging solutions offer numerous advantages: they provide floating and gentle storage for sensitive products, ensure secure transport, and offer a crystal-clear view of the contents. Thanks to their reusability and robust, stretchable inner film, these durable reusable packaging options actively contribute to environmental protection.

As you can see, quality and sustainability are important to us. We also offer the option to customise packaging to suit your individual requirements.

Enjoy exploring our catalogue – we look forward to a successful partnership in 2025!

Best regards from Bad Salzufen

### Terms and Abbreviations

ESD (Electro Static Discharge) stands for electrostatic discharge. It refers to a rapid transfer of charges between bodies with different electrostatic potentials.

### Standards

**DIN EN 61340-5-1** addresses electrostatics in Part 5-1, specifically the protection of electronic components against electrostatic phenomena. This standard covers general requirements (IEC 61340-5-1:2016).

**DIN EN IEC 61340-5-3** deals with the protection of electronic components against electrostatic phenomena. It specifies properties and requirements for the classification of packaging used for components sensitive to electrostatic discharges (IEC 101/618/CDV:2021).

### Resistance of conductive materials (according to DIN EN 61340-5-3):

Conductive materials can be surface conductive, volume conductive, or both.

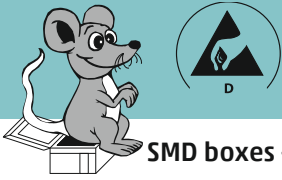

**Surface conductive materials (Dissipative):** Surface conductive material must have a surface resistance of  $\geq 1 \times 10^4$  to  $< 1 \times 10^{11}$  ohms.

**Volume conductive materials (Dissipative):** Volume conductive material must have a surface resistance of  $\geq 1 \times 10^4$  to  $< 1 \times 10^{11}$  ohms.

## VACUUM-FORMED TRAYS FOR TURNED PARTS AND WASHING PROCEEDING

**Customer:**

How can my products be thoughtfully presented yet securely packaged?

**Licefa:**

We develop a proposal for the outer packaging (e.g., suitcases) and the foam insert, ensuring that your products are optimally arranged and well-protected. Then, we provide you with a free sample for reviewing your requirements.

**The result:**

A coherent and homogeneous system packaging solution, all from a single source!
