

IEC-61557-7

### FIELD OF USE

Detex MS-152+ is a phase rotating field indicator.

### COMPOSITION

- 1 Phase indicator.
- 3 Test probes with a complete set of shrouded retractable protection and 1,2 m lead :
  - Green probe ref.: CX-35811.
  - Brown probe ref.: CX-34211.
  - Yellow probe ref.: CX-45411.
- 2 Insulated crocodile clamps :
  - Brown ref.: CX-01222.
  - Yellow ref.: CX-01422.
- 1 carrying bag ref.: M-87290.

### CHARACTERISTICS

- Phase rotation is provided by means of successive lighting diodes symbolizing the rotation.
- Clockwise: lighting according to "OK" order.
- Anti-clockwise: lighting according to "REVERSE" order.
- Fault: the fault diode lights on indicating a wrong connection, absence of phase or cut phase.
- Connection to neutral.
- Threshold for correct indication > 85 V.
- Cat III, IP 54, IK 06.
- Working voltage: 90 to 400 V – 45/60 Hz (+-10%)
- Working on generating set.
- Dimensions: 100 x 60 x 25 mm.
- Weight: 0,38 kg.
