

Features

- ESD – Designed to safely discharge static electricity and protect electronic components from electrostatic discharge events.

RS PRO ESD Footrest

RS Stock No.: 0687756

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

ESD FOOTREST

The footrest for ESD modular workstations is an advanced solution designed to enhance workplace ergonomics. Its innovative construction allows employees to maintain a proper and comfortable sitting position throughout their tasks. This is particularly important in environments where prolonged sitting is inevitable, as the footrest helps reduce leg muscle tension, leading to improved comfort and reduced fatigue.

The footrest is made from steel sheet metal and profiles with a minimum thickness of 1.5 mm, ensuring durability and sturdiness. The support surface is covered with ESD rubber matting, providing additional protection against electrostatic discharge. The adjustable height and tilt of the footplate allow for customization to individual needs, while levelling elements in the base increase stability, providing secure support during work.

This solution not only enhances work comfort but also supports healthy posture, which is invaluable in environments requiring extended sitting periods. Its functionality and flexibility make it an extremely useful piece of equipment that contributes to both user efficiency and health.

Accessories compatible with L & H Type workbenches 1200/1500/1800/2000
