

# SILKAIR ICE FREE

ISO VG32 low freeze pneumatic airline lubricant.

## BENEFITS

- Completely miscible with water in all proportions
- Very low pour point giving a wide range of operating temperature conditions
- ISO 32 viscosity rating allows SILKAIR ICE FREE to be used as a direct replacement for mineral oil without adjustment of lubricator feed rates

## APPLICATION

Although primarily designed as a pneumatic tool lubricant there are many other applications where deicing, and absorption of water to prevent re-freezing, is required.

Contains: Fatty alcohol ethoxylate Danger. Causes serious eye damage. Wear protective gloves/protective clothing/eye protection/face protection. IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Immediately call a POISON CENTER or doctor/ physician.
