Wera chiseldriver set for fastening, chiselling and loosening seized screws or screw clamps. With multi-component Kraftform Plus handle to avoid hand injuries such as blisters and calluses. Hard materials to ensure rapid hand repositioning without any danger of the skin sticking to the handle. Soft zones ensure high torque transfer. The hexagon blade made out of high-quality bit material extends right through the handle - thereby ensuring full transfer of force, even when struck with a hammer. The ductile tempered material prevents the blade from splintering or breaking. With integrated impact cap to lengthen service life and reduce the danger of splintering. Higher torque can be transferred via the integrated hex bolster or the hexagonal blade. The Wera Black Point tip ensures precise fit and enhanced corrosion protection. The non-roll feature prevents any rolling away at the workplace. With screw symbol and tip size identification markings on the handle to make it easier to find the right screwdriver in the tool case or at the workplace. Including a plastic storage rack, ideal for the clearly arranged storage in your workshop
