

CUPROBRAZ PH 70

Flame filler metal
Brazing

Metal rods for copper alloys brazing.

The most products:

- It does not sparkle; moreover it is self-cleaning on a copper-copper assembly.

Application domain:

- Sanitary installations and copper boiler

Specific characteristics :

- Copper-phosphorus metal rods
- This brazing rods allows the realization of close joints or superimposed without remelting of the previous ones.
- Economic brazing of copper pipes

Presentation:

- Cuprobraz Copper phosphorus rod

Melting range : 710-820°C

Composition :

Cu : 93% - Ph 7%

Pakaging CUPROBRAZ PH 70 :

W000382569 – Dia: 2 mm – L: 500mm – Plastic Bag : 1 Kg

Classification		
DIN	8513	L-CuP7
EN	1044: 1999	CP 202
EN ISO	3677:1995	B-Cu93P-710/820
EN ISO	17672:2010	CuP 180

Chemical analysis (Typical values in %)
