

SAV 3001N1

HYDRO-ALCOHOLIC GEL FOR HAND DISINFECTION BY FRICTION

For the prevention of Influenza A H1N1

Bactericidal agent NF EN 1040 and 1500 - Virucidal agent NF EN 14476 - Fungicidal agent NF EN 1275

The H1N1 virus is a mixture of genes from human, avian and porcine influenza viruses.

The appropriate antibodies to destroy this virus do not exist.

The type A / H1N1 is that of the Spanish flu pandemic of 1918.

The 20th century has witnessed three major pandemics:

- 1918, Spanish flu (influenza A virus, subtype H1N1): more than 20 million deaths

worldwide. A figure of 100 million deaths has been suggested.

- 1957, Asian flu (type A virus, strain H2N2): about one million deaths.

PROPERTIES

SAV 3001N1 is a regenerating and moisturising hydro-alcoholic gel for the disinfection of the hands by friction. SAV 3001N1 acts on bacteria and the swine influenza virus strain H1N1. In addition to its antimicrobial activity, SAV 3001N1 has regenerating and moisturising properties thanks to the coconut diethanolamide in its formulation. SAV 3001N1 refreshes the hands while leaving a soft and fragrant feeling on the skin.

SPECIFICATIONS

Composition:

Preparation based on bioethanol, isopropanol, coconut diethanolamide and lime scent.

Organoleptic characteristics:

Appearance: blue gel

Scent: lime

Physical and chemical characteristics

pH: 6.0 - 7.0

Microbiological Properties:

SAV 3001N1 complies with the standards of antiseptics and chemical disinfectants.

Bactericidal agent NF EN 1040, Pseudomonas aeruginosa CIP 103467 and Staphylococcus aureus CIP 4.83

Virucidal agent NF EN 14476 + A1 - H1N1.

Fungicide NF EN 1275, Candida albicans ATCC 10.231 and Aspergillus niger ATCC 16.404

SAV 3001N1, used for the **hygienic treatment of hands** with 2 successive 3 ml applications for 30 seconds, complies with the European standard **NF EN 1500 (September 1997)**.

Version: 01.2015

USES

SAV 3001N1 is used to disinfect the hands.

USERS

SAV 3001N1 can be used in all areas requiring strict hygiene, such as the food and electronics industries, clean rooms, care facilities, hospitals, public facilities and all workstations with a risk of microbial contamination.

INSTRUCTIONS

Hygienic treatment: Apply a dose of product 3 to 4 ml to clean and dry hands.

Rub hands, wrists, interdigital spaces and around the nails for at least 30 seconds until completely evaporated.

Renew the application during the day as needed.

External use on healthy skin only.

A preliminary test before use is recommended.

CONDITIONS OF USE AND STORAGE

Under normal storage conditions at room temperature, **SAV 3001N1** can be stored for 2 years.

Hazardous product, observe the precautions for use.

Use biocides carefully. Before use, read the labels and product information.

Consult the safety data sheet available on request.

COMPLIANCE AND STATUTORY MANAGEMENT

Preparation in accordance with Regulation (EC) No. 1272/2008 and its adaptations relating to the classification, packaging and labelling of hazardous preparations.

Produced in accordance with the decree of 19 December 2013 amending the decree of 8 September 1999 adopted for the application of article 11 of decree 73-138 of 12 February 1973, amended to implement the law of 1 August 1905 on fraud and falsification of processes and products used for the cleaning of materials and articles intended to come into contact with foodstuffs, products and beverages for human food and animal feed.
