

Datasheet

8 inch Gripping Driver Screwdriver, Slotted 0.02 in Tip

RS Stock number [547969](#)

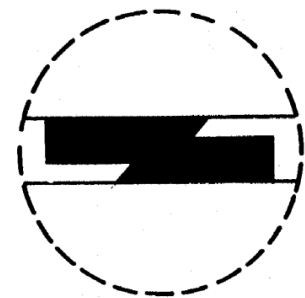

Description

- Split-bladed screwdrivers for gripping slotted head screws during location and extraction
- Blades have a sliding sleeve operated by a plastic collar (just below the handle) which, when pushed down, causes the blade tip to split apart and firmly wedge against the sides of the screw slot
- The blade is released by pulling back the sleeve
- Blade thickness is defined in the released condition
