Product Description

Bin rail is an invaluable component of ESD modular tables that significantly improves workstation organization. Made from sheet metal with a minimum thickness of 2.5 mm, it ensures strength and durability, enabling effective storage of various containers, trays, and baskets. This ensures that all necessary items are always within reach, promoting efficiency and orderliness at the workstation.

The rail is available in two length options: full-width and half-width. The maximum length of the rail is 2000 mm, allowing for flexible adjustment to different workstation configurations and optimal space utilization.

The container rail has a load capacity of up to 10 kg, ensuring safe storage of materials and tools. Containers mounted on the rail are easily accessible, allowing for quick retrieval of needed items and enhancing work efficiency in dynamic production and warehouse environments.

The container rail is an excellent solution that elevates the standard of workstation organization, ensuring order and convenience. By choosing our rail, you invest in efficiency, durability, and a modern approach to workspace management.
