

TECHNICAL DATA SHEET

RS 764-3020 Touch-Up Spray Paint

RS 764-3020 is a high quality and universal acrylic based touch-up spray paint in aerosol form. Exhibits excellent coverage and hardness and is ideally suited for use on enclosures, instrument panels, cabinets and test boxes etc. Available in grey.

- 100% ozone friendly
- Excellent coverage, flow and opacity
- Fast drying with good water and chemical resistance
- Excellent adhesion to bare metal

Typical Properties:

Resin Type:	Acrylic
Touch dry time (20°C):	< 20 min
Coat over time:	After 5 min
Odour:	Characteristic
Solubility:	Insoluble in water

Directions for Use

- Ensure that surface is dry, smooth and free of dust and grease
- For preparing surfaces use of a solvent cleaner is recommended
- Use an anti-corrosion primer to provide maximum resistance and durability
- To test, paint a sample panel in advance
- Shake spray-can well before use and at intervals during spraying
- Spray (holding aerosol vertically), at a distance of 25-30 cm from substrate
- Best results are obtained by applying several thin coats rather than one thick coat
- When spraying is finished, clear aerosol valve by turning can upside down and spray until only propellant is emitted

Packaging

200ml Aerosol, Grey
