## Guide to swapping your KT5W-2P1116 (RS Stock No. 741-7666)

After a long period of continuous availability, SICK is phasing out the KT5W-2P1116 and to help you select a replacement sensor we have provided the following information;

The KT5 series has been replaced by the vastly superior KTX and KTS contrast sensors. They offer better performance, greater flexibility and are easier to use.

If you want to us the same mechanical mounting points then you can use one of these two KTX sensors as a direct replacement. Your choice depends on which optical exit you were using in your existing KT5 configuration.

To replace long side exit
configuration

To replace short side exit configuration

KTX-WP91141252ZZZZ
KTX-WP91142252ZZZZ
RS Stock No: 180-6335

If you would like to add IO-Link capability to be able to control the sensors from a PLC or capture performance data for remote monitoring or cloud storage then we recommend you look at this sensor. Please remember to verify its correct operation for your application.
