Introduction to IMRAK® 1400

Since its introduction in the early 1990's, the award-winning IMRAK® 1400 enclosure range has enjoyed considerable success in the international networking and broadcasting markets. The widespread acceptance of IMRAK® 1400 among installers and end-users across the world lies in the inherent qualities of the enclosure platform, from its superior build quality to a vast array of accessories. IMRAK® 1400 is a particularly versatile 19" enclosure system that can be configured to adapt to very stringent and varied applications in the evolving electronic data communications industrial. IMRAK® 1400 is also exceptionally rugged and strong, allowing its users to ship fully equipped enclosures overseas. The cabinet's frame structure is bolted together, allowing the enclosure to be disassembled in situations where access is difficult. IMRAK® 1400 boasts attractive styling, finished in pale and dusty grey (RAL 7035/7037), making it equally suitable for office, equipment or communications rooms. Optional cover trims maintain the cabinet's elegant appearance when the front door is not required. Thermal management solutions, (including intelligent fan trays), and numerous locking options give almost limitless applications, on the market IMRAK® 1400 probably the most versatile enclosure available.

Technical features of IMRAK® ServerMax Size

Load capacity

IMRAK® ServerMax has been tested to ensure that in a static situation even the tallest cabinet (47U) can safely be fully loaded with 21 Kg per 'U'.

Thermal management

The perforated top cover and steel doors have an open area of 63% to ensure the minimum resistance to free moving air. Additional forced cooling can be added via zero 'U' height top mounted fan trays.

Data and power cable management

Space has been provided at the rear of the 19" unit to allow a working area for the power management and data cables. Cable access has also been provided in the top cover that does not restrict the use of top mounted fan trays.

Multi-platform solutions for rack mounted servers

The rear 19" panel mounts are split into three independently adjustable sections to allow for three different lengths of server mounting slides to be fitted. In the 42U the rear rails are split into three 14U section, in the 47U cabinet, two 14U and one 19U rear 19" panel mounts are fitted.

The cross sectional dimensions of the 19" Panel Mounts also correspond with HP mounting rails which allows even the largest HP rack mounted servers, that require the slides to be fixed on the front 19" mounted surface and side fixing, to be fitted.

IMRAK® plain steel door

IMRAK® glass door

Perforated and vented doors

Perforated single and double doors plus vented glass doors are suitable for the front or rear. IMRAK® is available in two colours. Shortened doors can also be fitted to provide space above or below the door in order to accommodate fan units, grills, different type of panels or cable entries.

To be used with:

- An IMRAK® frame of the same height and depth
- 5U panels
- Lock options include electronic or mechanic locks
- Earthing kits
- Glass door trim, earthing kit (glass door only)

Infill panels

These panels have a height of 5U. For example, a panel plus 37U door would fit a 42U enclosure. They may be fitted above and/or below a glass or steel door.

Typical use is to allow mechanical handling of cables i.e. to accept connectors/cable glands, or bulk cable access using the cable brush version.

To be used with:

Front and rear doors.

Top covers

Side vented

High top side vented - allows air flow through side slots.

Fully vented

High top fully vented - allows air flow through a matrix of square holes on top as well as side slots. Recommended when fan trays are to be used.

IMRAK® ServerMax fully vented with cable entry

High top fully vented with 63% open area perforation plus a glanded cable entry area of 402 x 122 mm.

Note: this top cover is only available for 1.000 mm deep IMRAK® ServerMax Cabinets.

To be used with:

- An IMRAK® frame of the same plan size
- Earthing kits if required
- Top mounted fan trays
- IMRAK® ServerMax top can be used with a 'cable entry brush kit'

19" Panel Mounting Angles - 'Standard'

19" Panel mounts are supplied in pairs. Incorporated into the design of the mounts are notches in the center of each U height which makes the positioning of the cage nuts much easier. The panel mounting may be attached directly to the vertical corner. In this case front to rear adjustment is 60mm per panel mount. Alternatively the panel mount may be fitted onto panel mount angle supports giving infinite adjustment throughout the depth of the rack.

To be used with:

- An IMRAK® frame of the same height or taller
- 'Reducing Cable Channels' required in 800 mm wide cabinets
- 'Panel Mount Angle Supports' if full adjustment through the depth of the cabinet is needed
- 'Panel Mount Angle Spacing kit' if 'Panel Mount Angle Supports' are to be set out towards the side panel
- Earthing kits if required
- Chassis supports and all other 19" mounted accessories mounted on 19" Panel Mount Angles

Contents of kit

19" Panel Mounting Angles - 'Simple'

Simple 19" panel mounts are supplied in pairs to provide 19" mounting positions on universal centres. Simple 19" panel mounts may be attached directly to the corner vertical, 60mm from the front door, or onto panel mount angle supports giving adjustment throughout the depth of the rack in 20mm increments. They allow directly fixed chassis trays to be used when the panel mounts are fitted onto the verticals. Simple 19" panel mounts have no side mounting positions.

To be used with:

- An IMRAK® frame of the same height or taller
- 'Reducing Cable Channels' required in 800 mm wide cabinets
- 'Panel Mount Angle Supports' adjustment of 20 mm increments through the depth of the cabinet is needed
- Earthing kits if required
- Directly fixed chassis trays

19" Panel Mounting Angles - 'Simple'

Panel mounting supports

Panel Mount Angle Spacing kit

This bracket can only be used when the panel mounting angle supports have been mounted out towards the side panel. Using the panel mount angle spacing bracket extra cable management room can be gained outside the 19" width, and behind the vertical. The load capacity is 200 Kg per pair.

To be used with:

- An IMRAK® frame 600 mm wide
- Must be bolted to a set of 'Panel Mount Angel Supports'. On to the bracket.
- 'Standard' or 'Simple' 19" Panel Mounting

Adjustable feet

These allow you to align your rack on uneven surfaces. Adjustable feet are screwed directly into the corner blocks, using 10 mm threads. An adaptor is required when feet are to be fitted as well as heavy duty castors. They can be adjusted from 25 mm to 40 mm. Each set has a load capacity of 1.000 kg

To be used with:

- Adjustable feet to be used with an IMRAK® end frame
- Adjustable foot adaptors are required when heavy duty castors are fitted or when a 100 mm plinth is fitted.

Note: adjustable feet can not be used at the same time as light/medium duty castors as both are fixed via the same 10mm threaded hole in the end frame.

100 mm plinths

Plinths kit

Plinth kits are available in two heights; 100 mm or 200 mm. Plinth kits consist of four identical corner sections and four infill sections which allow easy modification for cable entry. Adjustable feet, will align IMRAK® on uneven surfaces. They can be fitted to a plinth when the use of 'adjustable foot adaptors' are needed. Plinths may be stacked to provide additional height. The plinth has a static load capacity of 1.000 Kg.

To be used with:

- IMRAK® end frame
- Adjustable feet when adjustable foot adaptors are also fitted

Extension plinth

Extension plinths are designed to provide increased stability when using heavy equipment, and are recommended for cabinets fitted with 800 mm glass doors or heavy duty sliding shelves. Each plinth has fixing studs for heavy duty castors, and threads fitted to attach adjustable feet. Castors and adjustable feet must be ordered separately. The load capacity is 1.000 Kg.

To be used with:

To be fitted to IMRAK® end frames and is recommended when heavy equipment is mounted into the cabinet on slides.

Top mounted fan trays

Standard fan trays

Top mounted fan trays are available to aid the cooling of your rack-housed equipment. These may be retro-fitted to the IMRAK® 1400, and do not occupy any of the useable U height. Fan trays are supplied with four or six fans. Top fan trays have closing plates fitted in all unused positions. Connection to all fans is by means of a CEE 22 mains inlet, which must be used separately. Select appropriate lead mains from lower table.

To be used with:

To be fitted into the appropriate IMRAK® top end frame. Power leads need to be ordered separately.

Monitored fan tray

IMRAK® MFT is a new concept in fan trays. This product applies the IMRAK® concept of 'Configured upon Requested temperature control'.

The IMRAK® MFT contains all the basic monitoring and control features for a rack and allows to expand its technical characteristics.

Features

- Lower average noise level at room temperature
- Extended MTBF (mean time before failure) due to lower average speed
- Fans controlled individually or in groups
- Local or remote alarm monitoring
- Variable or constant temperature range monitoring
- World wide voltage input

To be used with:

To be fitted into the appropriate IMRAK® top end frame.

Power lead needs to be ordered separately.

Lock options

Both the metal and glass doors can have a swing handle fitted as an option. The steel perforated and glass vented doors have swing handles and lock covers fitted as standard when a lock is not required. A lock blank fills the hole in the swing handle. It also acts as a spring clip, holding the handle into its housing. Please note, the locks for the swing handle needs to be ordered separately.

Lock with key - self locking

All locks supplied with the same key and the door automatically locks when closed.

Lock with Key - manual locking

All locks supplied with the same key. To lock the door the key must be turned.

To be used with:

To be fitted to both glass and steel doors

Chassis supports

These steel supports may be fitted along the depth of the rack and offer an ideal method of supporting heavy equipment. When used in conjunction with 19" equipment they position card frames accurately in line with U heights. The horizontal sections of the supports are pre-punched to allow the chassis trays to be fitted without further drilling.

An extra 15 mm width is available when chassis supports are fitted directly to panel mounting angle supports when maximum chassis width is then 465 mm. The load capacity is 50 Kg. Chassis supports are sold in pairs.

To be used with:

- To be fitted to 'standard 19" Panel Mount Angles or fitted directly to Panel Mount Angle Supports
- Chassis trays and Heavy duty shelves mount onto Chassis Supports

* Supports suggested in cabinets with depth of 800 mm to 1000 mm.

19" chassis trays

These steel trays come in four depths so that the correct depth for your installation may be selected without interfering with cabling or power distribution at the rear. The slots in the tray allow for good air-flow and, at the same time, offer a selection of fixing positions to allow modems and instruments to be screwed into position. With this style of tray a pair of chassis supports is also required.

Notes: Units 600 mm or 800 mm wide may be fitted on chassis supports bolted to the lateral sides of the cabinet.

For 600 mm wide units fitted on chassis supports and fitted on 19" mountings require four panel mountings on the cabinet. The load capacity is 50 Kg.

To be used with: To be fitted Chassis Supports

19" cantilever shelves

Chassis tray to fix directly to vertical members

These trays are designed for applications where equipment wider than 19" is to be mounted or used in conjunction with 'simple 19" panel mounts'. As they are fitted directly to the vertical corner members, no chassis supports or panel mounting members are required, thereby reducing cost and complexity. The load capacity is 50 Kg.

To be used with:

These chassis trays can only be used with 'simple 19" panel mounts' when fitted vertically (NOT on panel mount supports).

Sliding shelves - 19" fixing

This shelf will fit into the IMRAK® enclosure that has 19" panel mounts fitted in the front and rear of the enclosure, independent of whether the enclosure is 600 mm or 800 mm wide. The supporting surface of the shelf is in-line with the bottom of the 'U' above it, therefore the shelf can be used to support both 19" mounted equipment as well as non 19" mounted equipment. The load capacity is 35 Kg.

To be used with:

Must be used with 19" Panel Mounting Angles fitted front and rear.

Cable Management

1. Plastic cable trunking

A plastic cable with external snap-on cover measuring 80 mm wide by 40 mm deep can be supplied in 2 m lengths and easily cut for other sizes.

2. Steel cable trays

Available in four alternative lengths, all 152 mm wide by 12,7 mm deep and multi-punched for varied cable insertion.

3, 4, 5, & 6. Cable management panels

19" mounting cable entry, brush strip and cable hoop panels

7 & 8. Single and double cable hoops

Single cable hoops can be fixed to the inside face of the vertical corner members. Single sized hoops are available for racks with side panels.

Double sized hoops can be fitted to the inside faces of the vertical corner members when the racks are bayed together. The hoops may also be fitted on cross members at the rear of the rack or from panel mount supports to the side of the rack.

9. Cable bar

For 19" mounting and support cable at the rear of panel mounts.

To be used with:

- Items 1 & 2 fit to 'panel mounting supports'
- Items 3, 4, 5, 6 & 9 fit horizontally across the '19" panel mounts'
- Item 7 mounts to the back of IMRAK® vertically
- Item 8 mounts on the inside of the 'cable reducing channel' used on 800 mm wide cabinets and can also be mounted across the rear of IMRAK® vertically in bayed applications

Earthing & busbar systems

Earth continuity kits

Two styles of earth continuity are available. Each contain ten leads to earth all panels and doors, leaving extra leads to earth parts of the electronic equipment.

Type 1 has ring terminals at both ends to mount directly onto the earth studs on the panels.

Type 2 has a ring terminal on one end and a spade (faston) at the other.

Adaptor rings are provided for bolting onto the earth studs in order to allow quick removal and assembly.

Contents of kit

Description	Qty	Material	Finishes
Earth continuity kit	1	1.5 mm steel	Light grey RAL 7035
Fixings

Earthing bars

These earthing busbars offer the option of bonded earth or isolated conditions. Earth conditions by using insulated spacer strips. They have male spade fixing positions at 1/2U intervals and can be mounted on any flat surface. Mounting holes allow assembly without further drilling on the inside faces of IMRAK® as illustrated. Made from nickel plated copper, the earth bars have a rating of 40 Amps and can be cut to specific lengths. Main earth is provided by M6 studs at both ends.

Busbar systems

This is a common copper ,earth/neutral busbar which is normally fitted to the rear vertical of the rack. It has a rating of 140 Amps and supported by polyamide insulating blocks which will accept 4 mm, 5/32", or 6BA fixing screws. There are three sizes of terminals for conductor dimensions from 1,5 mm to 35 mm.

Note: The busbar is simply fitted to the blocks using 'snap-on' clips

Contents of 'complete busbar' kit

Description	Qty	Material	Finishes
Earthing bar: 10 mm x 3 mm x 1000 mm	1	Copper	N/A
Insulated mounting blocks	3		
Large terminal: 16 - 35 mm conductor	1		
Small terminals: 1,5 mm - 4 mm 2 conductor	10

Electrostatic point (E.S.P.) and electrostatic wrist strap and lead

The E.S.P. is designed to protect against electrostatic discharge damage of the electronic equipment. This self-tapping screw stud will be fitted on the midpoint of the front left-hand vertical, unless otherwise stated. The electrostatic wrist strap and lead are to be used with the E.S.P.

To be used with:

To be fitted vertically onto the cabinet's

Magnetic lights

The magnetically attached lights are ideal for use in any environment with steel racks and can be used both in horizontal or vertical position. The lights are available in U shaped fluorescent tube version or in led version also with integrated movement sensor. The power cord must be purchased separately.

To be used with:

To be fitted onto Chassis Supports
