

FHD-MCL-15-F

Ruland FHD-MCL-15-F, 15mm Face Mount Shaft Collar with Drilled Hole,
Black Oxide Steel, One-Piece Clamp Style, 34mm OD, 13mm Width

Description

Ruland FHD-MCL-15-F is a one-piece shaft collar with a 15mm bore, 34mm OD, and 13mm width. FHD-MCL-15-F has drilled holes for mounting shaft collars to sprockets, pulleys, metallic plates, or other components. Drilled holes give the user flexibility to choose inch or metric mounting hardware that best suits the application. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. Equipment manufacturers benefit from the tightly controlled face to bore perpendicularity (TIR of ? .05mm). Perpendicularity is critical for alignment when the shaft collar is used as a load bearing face, mechanical stop, or for mounting components such as gears or bearings. Proprietary processes have been developed by Ruland to maintain superior fit, finish, and holding power. FHD-MCL-15-F is stamped with the Ruland name and bore size for ease of identification. Forged screws test beyond DIN 912 12.9 standards to ensure maximum holding power. FHD-MCL-15-F is machined from solid bar stock to a fine burr free finish and sourced exclusively from North American mills. Ruland uses 1215 lead-free steel with a proprietary black oxide finish that produces a fine glossy finish while increasing holding power and resisting corrosion. It is RoHS3 and REACH compliant and manufactured in our Marlborough, MA factory under strict controls using proprietary processes.
