WP70

2-channel cable protector on a roll, 20 x 10 mm

This versatile range of cable protectors is ideal for accommodating between one and several cables thanks to its channels. The cable protector can be easily cut to the required length. The warning strip provides greater visibility for pedestrians. It can be used both indoors and outdoors, in pedestrian areas or where vehicles pass. It features a ribbed, non-slip base and a slotted rear section to facilitate use and the loading of cables from below. Its design allows it to be unrolled and laid flat with ease; it also helps to prevent the risk of tripping whilst protecting the cables.

Customs code	3926909090
EAN	3321360120649

Color : Yellow/black

Material : PVC

Specifications :

- Fitted with 2 20x10mm channels.
- Cables loaded from below.
- Easy to unroll and install.
