ESD TOOL BALANCER CART

The balancer cart for ESD modular tables is an ideal solution that significantly enhances ergonomics and work efficiency. Designed for mounting balancers and other equipment on a support rail, it supports a maximum load of up to 15 kg, making it a versatile tool in production environments.

Constructed from durable stainless steel and equipped with ball-bearing rollers and polyamide tracks, the trolley ensures smooth and reliable operation. Its primary function is to balance the weight of suspended tools and devices, reducing physical strain on workers and thereby increasing work comfort and productivity.

The balancer trolley minimizes the risk of accidental tool drops, which improves workplace safety and protects equipment. Additionally, a version with a position lock is available, allowing for stable positioning of tools at a chosen location. This feature ensures that tools are always within easy reach, enhancing precision and control over tasks.

Accessories compatible with L & H Type workbenches 1200/1500/1800/2000
