

Light cleaning & corrosion protection for electrical contacts

De-Solv-it® Contact Cleaner & Protector (DSI 5000CCP)

FEATURES/BENEFITS:

Effective	Removes dirt, dust & grime
Corrosion Protection	Protects against humidity & moisture for up to 2 years
Compatible	No adverse effects on electrical resistance or magnetic & surface properties of metals
Sensitive	Use on delicate relays, sensors, wires, instruments
Easy to Use	Simply spray on & wipe off, or leave on for VCI protection
Versatile	For use on all metals & plastics

USE:

Spray Contact Cleaner & Protector over surface and wipe off with cloth. For corrosion protection, lightly spray it over the component and allow to dry.

APPLICATIONS:

Cleans sensitive electrical component leaving a protective layer of Vapour Corrosion Inhibitors to protect against the effects of moisture and humidity. This film does not alter the electrical resistance, magnetic or surface properties of metal substrates and provides instant protection for up to 2 years on relays, instruments, PCB's, enclosures, wires, fuses connectors, sensors and communication equipment.

PRECAUTIONS:

For further information see MSDS

SPECIFICATIONS:

Form Aerosol
Colour Clear
Odour Hydrocarbon
Melting Point..... Undetermined
Boiling point..... 180°C
Flashpoint: <0°C
Density (20 °C) 0,8 g/cm³
Miscibility in water Insoluble
pH (20 °C) Not determined
