

## FHT-MCL-32-SS

Ruland FHT-MCL-32-SS, 32mm Face Mount Shaft Collar with Tapped Hole, 303 Stainless Steel, One-Piece Clamp Style, 54mm OD, 15mm Width

## **Description**

Ruland FHT-MCL-32-SS is a one-piece shaft collar with a 32mm bore, 54mm OD, and 15mm width. FHT-MCL-32-SS has tapped holes for mounting shaft collars to sprockets, pulleys, metallic plates, or other components. Tapped holes allow for a secure connection between the shaft collar and mated component. The clamp style design does not mar the shaft, is easy to remove, and is indefinitely adjustable. Equipment manufacturers benefit from the tightly controlled face to bore perpendicularity (TIR of?.05mm). Perpendicularity is critical for alignment when the shaft collar is used as a load bearing face, mechanical stop, or for mounting components such as gears or bearings. Proprietary processes have been developed by Ruland to maintain superior fit, finish, and holding power. FHT-MCL-32-SS is stamped with the Ruland name and bore size for ease of identification. Forged screws test beyond DIN 912 12.9 standards to ensure maximum holding power. FHT-MCL-32-SS is machined from solid bar stock to a fine burr free finish and sourced exclusively from North American mills. Ruland uses 303 stainless steel with hardware of like material for consistent corrosion resistance. It is RoHS3 and REACH compliant and manufactured in our Marlborough, MA factory under strict controls using proprietary processes.
