

Datasheet RS Stock No:1247174

Bright Zinc Plated Steel, Hexagon Countersunk Socket Screws: Metric Thread

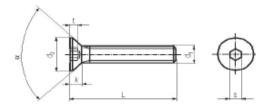

Countersunk socket screws are designed for light duty applications where there is limited space. These screws are widely used in many applications where a strong and reliable joint is required. Typically countersunk socket screws are used to fasten plates and strips of metal to equipment and machinery as their flat head allows a flush flat finish. This range of socket screws is bright zinc plated and is suitable for indoor and dry environments

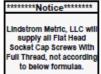

- •Threaded in accordance with Din 7991 standard
- Bright zinc plated
- Used in applications where a wider head and lower profile is required
- Suitable for light fastening applications
- Typical applications include; Machine tooling, Security Guarding, Panel Building and General Fastening Applications
- Also used in many internal joinery applications
- Requires a Hex key / Allen key

Please view our full range listing below for all A4, 316 Stainless Steel Hexagon Socket Countersunk Head Screws.

*******Notice******* Diameters and or Lengths shown with () are not shown in some standards are not recommended for use in new design.

*******Notice******

DIN 7991, ISO 10642, and ANSI B18.3.5M are not Intended for high strength applications. The only purpose of having them produced in property class 10.9 or 12.9 is to increase the wear resistance of the socket drive.
