

## FUCHS COPPER PASTE

### Assembly grease

#### Description

FUCHS COPPER PASTE is a high temperature non-melting, anti-seize grease.

FUCHS COPPER PASTE is designed to control pitting, rusting, thread distortion and seizure due to corrosion.

FUCHS COPPER PASTE overcomes galling on assembly and reduces torque requirements when dismantling.

#### Application

FUCHS COPPER PASTE is a special lubricant for threaded connections including assembly studs, on manifolds, cylinder heads, exhaust systems, suspension components.

FUCHS COPPER PASTE is also suitable for use on spark plug threads and can even be used on brake calliper, pins and the back of brake pads.

FUCHS COPPER PASTE combats corrosion, fretting and seizure.

#### Advantages/Benefits

- Reduces the force required when dismantling
- Prevents seizure and fretting corrosion in a variety of applications
- Lubricates in temperatures up to 1100°C
- Guards against pick-up and galling.

## CHARACTERISTICS: FUCHS COPPER PASTE

### Characteristics

Colour	Copper
Texture	Smooth
Worked penetration 1/10 mm	265-295
Drop point °C	Non-melt
NLGI Classification	2
