RS Pro Transparent Label Printer Tape

Product Details

Quick-Mark Labelling System

Labelling system for in-house production of durable coloured signs, labels, warning notices and front panels.

Create PC generated artwork on LaserStar film (Stock no. 286-6773 and 286-6789)

Expose with imaging film in UV unit Stock no. 559-934

Peel layers of film apart on low-tack adhesive peeling board

Peeled layer will be reversed image of original artwork

Film on peeling board is a positive duplicate of artwork

Laminate with application fluid to plastic base sheet

Select the piece of imaging film which will result in the emulsion being sub-surface. If not possible add over-laminating film for protection

Trim to required size

A starter kit is also available; it contains the basic components needed to create the labels:-

- Imaging film
- Base sheets
- Over-laminate
- Peeling board
- PAI applicator
- Applicating fluid
- HB104 pads

Specifications:

Background Colour	Transparent
