

Feature

- High-precision
- High sensitivity
- Wide linearity range
- Strong anti-interference ability
- Extraordinary reliability

Tip

More details about Grove modules please refer to [Grove System](http://wiki.seeedstudio.com/Grove_System/) [http://wiki.seeedstudio.com/Grove_System/]

Specification

Items	Parameter
Measurement Range	0-25%
Detect Life	two years
Sensitivity	0.05~0.15 mA(in air)
Temperature Range	-20 oC~50 oC
Preheat Time	20 minutes
Input voltage	3.3V / 5V
