## Product description

The *Electrician's Guide to Emergency Lighting* is one of a number of publications prepared by the IET to provide guidance on electrical installations in buildings. This publication is concerned with emergency lighting and in particular emergency escape lighting and must be read in conjunction with the legislation: Approved Document B and the British Standards, in particular BS 5266.

**About the Author:** Paul Cook CEng FIEE was the Principal Engineer in the Technical Regulations department of the IEE. For many years he was closely involved in the preparation of the IEE Wiring Regulations BS 7671 and related publications. He has wide experience of electrical contracting in various roles from design engineer to business manager.
