Datasheet
RS Pro 5m White LED Strip

RS Pro: 136-3583

Specifications:

Strip Led for intensive professional usage. Being resin-free, this strip led offers high brightness lighting and delivers a very high power of 1080 lumens/m (i.e. 90W/m). Its density of 60 led per meter delivers a homogeneous light on the whole strip length. It's the best choice for a source of main lighting for large surfaces in a professional environment (main hall, restaurant, hotel, meeting room, etc.) or in a private one (salon, living-room).

Warning: being resin-free requires its use to be distant from any source of water spray.

Features:

- Electric consumption / m: 14W
- Power / m: 980 lumens
- Protection: none (IP20)
- Lighting: warm white 4000K
- Dimension (L x l x h): 250/500 x 10 x 3 mm
- Density of led / m: 60
