SYSTEM PRO1

The first modular tool box system from RS PRO, thanks to its most compact size, is easy to transport and ideal for work in hard-to-reach places.

The multitude of different modules (chests, drawers, organisers, modular boxes) allows you to create extensive and mobile sets. The SYSTEM PRO1 line also offers protection against water and dust at the IP54 level and can be used in harsh environment.

The black boxes are made of recycled polypropylene; their bodies include areas for knurls, and, depending on the user's preferences, they can be used to expand the system with customisation accessories.

RS PRO APPROVED

RS PRO CHOICE

RS PRO VALUE

FEATURES

Waterproof and dustproof

Compact size

Modularity and compatibility

WHEELS

Solid wheels mounted on a metal axle

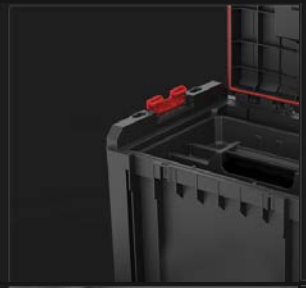

COVER

Impact-resistant transparencies made of polycarbonate (PC)

DESIGN

Appropriate ribs ensure high durability of the modules
