

Metalux ND 10 9870

ADJUSTABLE VERTICAL WITH PULL-ACTION AND EUROPEAN PROFILE RIM LOCK

The Metalux ND 10 9870 lock can be integrated on a wooden door or on a grid. Available on right or left hand, it is equipped with a deadbolt and a latch.

It is modular and its deadbolt and latch are adjustable. It can therefore replace most European profile rim locks. The existing strike plate can be kept thanks to its universal design. Finally, this lock is reversible pull/push without dismantling.
