

Parker Product Datasheet

The replacement elements of the Parker DF60 Duplex Filter Series feature high quality filter materials.

PART NUMBER: 939233Q
FILTER ELEMENT: 20Q Microglass *

PRODUCT OVERVIEW

Items marked with an asterisk * in the drop-down menus are standard choices.

The high quality replacement elements of the DF60 duplex filter series are available with glassfibre and metal mesh filter materials and several micron ratings. These replacement elements ensure the quality of filtration Parker is known for.

Using genuine Parker replacement elements guarantees Parker’s quality of filtration. Using after market filters with unknown media quality may save initial cost, but can increase overall costs by requiring more element change outs and potentially causing system downtime. Protect your investment by always buying genuine Parker replacement elements.

TECH SPECIFICATIONS

DIVISION	Hydraulic & Industrial Process Filtration Division EMEA
PRODUCT SERIES	DF60
SEAL MATERIAL	Fluoroelastomer

FILTER ELEMENT TYPE

Disposable element for re-usable innercore

**MAXIMUM PRESSURE
DIFFERENTIAL**

5 bar on Re-usable Innercore (ISO 2941)
