

Features

- ESD – Designed to safely discharge static electricity and protect electronic components from electrostatic discharge events.
- Full Metal Construction

RS PRO ESD PC Holder

RS Stock No.: 0687746

RS Professionally Approved Products bring to you professional quality parts across all product categories. Our product range has been tested by engineers and provides a comparable quality to the leading brands without paying a premium price.

Product Description

The PC holder for ESD modular workstations is a crucial element in modern production environments, combining functionality with technological safety. It provides an ideal place to store desktop computers, protecting sensitive components from damage caused by electrostatic discharge (ESD).

The shelf is constructed from 1.5 mm thick metal, ensuring both durability and stability. With a load capacity of up to 15 kg, it provides secure support for the computer, while tool-free mounting on a perforated panel allows for quick and easy installation.

This versatile PC shelf not only optimizes workspace but also provides technological protection, making it an indispensable accessory in advanced manufacturing facilities. Its robust construction and ease of installation make it an ideal solution for ensuring safety and efficiency in the workplace.

Accessories compatible with L & H Type workbenches 1200/1500/1800/2000
